

Hi,

my name is Emma, I'm 16 years old and I live in the Southwest of the France with my parents and my big brother. I have two cats: Manhattan after the New York neighborhood and Junior (but we nicknamed him Boubou).

I'm in junior year in a high school next to the beach and I'm studious. I'm sportive, I have been practicing volleyball since I was little with my parents and I've been competing for two years. I love that !!!

I have learned the piano for 4 years and then 4 years of singing. I have been part of several music bands during 2 years but now I have created a band named "the Why Green" with my brother and my friends. I have fabulous friends with whom I grew-up because they are the kids of my parents' high school friends. So you can see I love music, especially Coldplay. I don't know if you know them but I went to one of their concerts in 2017 in France and this summer in London.

During this summer, I also traveled to Florida but it was not my first time in the USA. In 2017 I went to New York and I fell in love with the USA.

I want to discover this country, its landscapes, its culture and its way of life. I dream to do my studies here but I think it's not going to be easy. In fact, I want to become a surgeon and medical studies are difficult. I have to learn the medical glossary in French, Latin and English, but why not turn it into a challenge. This year, I chose to take anatomy class in addition to the usual classes at school.

I like spending time with my family and my friends, I love cinema, sports, animals, going to the beach (I practice surfing with my father), the sun and traveling. I had the chance to travel in different countries such as Spain, England, Italy, Tunisia, China and of course the USA.

I'm motivated to do all the activities you want to do and spend a lot of time with you.

Thank you very much to receive me in your home. Thank you for your welcome and your kindness.

With all my love !

Kisses

Emma
